Education

Gachon University, B.S. in Artificial Intelligence Mar. 2023 – Present

- Completed in the first semester of the third year
- GPA: 4.40/4.5 (Overall), 4.43/4.5 (Major)

Experience

AI Research Ready Internship, University of Birmingham Jul. 2025 – Aug. 2025

- Developed the voice conversion model that converts dysfluency voice to fluency voice.
- Sponsored by Google Deepmind.

Undergraduate Research Assistant, HCI Lab – Gachon University Oct. 2023 – Present

- Conducted a research project in collaboration with Seoul Asan Medical Center, focusing on web development for a medical research task.
- Developed deep learning-based techniques for recognizing user behavior patterns and interactions using video and sensor signals.
- Designed a smart wearable-based disease management model to enhance healthcare monitoring and prediction.

Leadership & Extracurricular Activities

DACON Competition Challenger, DACON Mar. 2025 - Present

President, TakeOut Autonomous Driving Club, Gachon University Sep. 2024 – Feb. 2025

Kaggle Competition Expert, Kaggle Aug. 2024 - Present

Google Machine Learning Bootcamp, Google Jul. 2024 – Oct. 2024

Member, GADIS Autonomous Driving Club, Gachon University Dec. 2023 – Present

Executive Member, TakeOut Autonomous Driving Club, Gachon University Sep. 2023 – Present

Honors & Awards

SW Centered University Council President Award Aug. 2025
2025 SW Centered University

- Developed AI that predicts whether the sentence is written by human or generated by LLM.
- Top 4

Gachon Telent Award Apr. 2025
Gachon University

Intelligent Multimedia Research Center Director Award Jun. 2025
Sungkyunkwan University

- Developed technology that detects AI bias using LLaMA 3.1 8B. This competition organizer limit to fine-tune. So, did prompt engineering, few-shot and LLM inference optimization.
- Top 4

Minister of Employment and Labor Award Apr. 2025
LG AI Research

- Achieved first on the leaderboard using only deep learning models although it was structured data.
- Used SAM Optimizer, F1 Loss, Weight Brier Loss, Multi-task Learning and Feature embedding.

- Top 0.06% (1 of 1569).

Minister of Science and ICT Award

Nov. 2024

Ministry of Science and ICT

- Developed a Deep learning model that can detect pedestrians, cars, and cyclists from 64-channel and 128-channel LiDAR data.

IITP President Award

Nov. 2024

Ministry of Science and ICT

- Developed a Deep learning model that can detect pedestrians, cars, and cyclists from 32-channel LiDAR data.

Korea Transportation Safety Authority Award

Nov. 2024

Korea Transportation Safety Authority

- Developed a model distinguishing cones from the point cloud obtained from 32-channel LiDAR and distinguishing whether it is a left cone or a right cone.

Korea Agro-Fisheries & Food Trade Corporation Director Award

Nov. 2024

Ministry of Agriculture, Food and Rural Affairs

- Participated in a competition to forecast agricultural product prices 10, 20, and 30 days ahead using various features.
- Top 0.6% (3 of 1156).

Hankuk University of Foreign Studies President Award

Oct. 2024

Hankuk University of Foreign Studies

- Participated in a news classification competition using 55,000 article titles and keywords and conducted model comparison and found that LGBM with SVD and TF-IDF outperformed a BERT-based model.
- Top 2.

National Institute of the Korean Language Director Award

Sep. 2024

National Institute of the Korean Language

- Developed a dialogue understanding model to select the most contextually appropriate response from three choices and evaluated multiple LLMs (LLaMA3-8B, Gemma2-9B, SOLAR-10.7B); selected SOLAR-10.7B as the backbone model due to superior performance.
- Top 5.

42Maru CEO Award

Sep. 2024

SW Centered University

- Developed a model that can distinguish whether the speaker heard in a voice is real or deepfake.
- Top 11.

HL Clemove CEO Award

Oct. 2023

HL Mando, HL Clemove

- It is a competition where you have to drive on a course that is divided into areas where you have to follow the line and areas where you have to move forward while looking at the wall.

National Information society Agency Award

Oct. 2023

National Information society Agency

- Since there is a rule that only Resnet can be used, I used various methods other than changing the model to improve performance and to classify 50 Korean foods.

Ulsan Institute of Science and Technology (UNIST) President Award

Jul. 2022

UNIST

- The competition requires participants to complete two tasks over the course of four nights and five days: writing code that parallelizes specific codes to run as quickly as possible, and developing a model for detecting whether a mask is worn.

Scholarships

Presidential Science Scholarship

Mar. 2025 - Aug. 2026

- President of the Republic of Korea
- Selected as one of the Top 60 Countries for Developing World-Class Scientists.

Academic Excellence Scholarship

Sep. 2023 – Feb. 2025

- Gachon University

Technologies (Skilled)

Languages: C++, C, SQL, Python

Technologies: PyTorch, ROS

Tools & Platforms: Git, GitHub, Docker, Linux (Ubuntu), MacOS, Windows
