Education

Gachon University , B.S. in Artificial Intelligence	Mar. 2023 – Present
- Completed in the first semester of the third year - GPA: 4.40/4.5 (Overall), 4.43/4.5 (Major)	

Experience

BSURE 2025 , University of Birmingham	Jul. 2025 – Aug. 2025
- Developed the voice conversion model that converts dysfluency voice to fluency voice. - Sponsored by Google Deepmind.	
Undergraduate Research Assistant , HCI Lab – Gachon University	Oct. 2023 – Present
- Conducted a research project in collaboration with Seoul Asan Medical Center, focusing on web development for a medical research task. - Developed deep learning-based techniques for recognizing user behavior patterns and interactions using video and sensor signals. - Designed a smart wearable-based disease management model to enhance healthcare monitoring and prediction.	

Leadership & Extracurricular Activities

DACON Competition Challenger , Dacon	Mar. 2025 - Present
LG Aimers 6th , LG Ai Research	Jan. 2024 – Apr. 2024
Ranker Special Lecture , DACON	Sep. 2024
President , TakeOut Autonomous Driving Club, Gachon University	Sep. 2024 – Feb. 2025
Kaggle Competition Expert , Kaggle	Aug. 2024 - Present
LG Aimers 5th , LG Ai Research	Jul. 2024 – Sep. 2024
Google Machine Learning Bootcamp , Google	Jul. 2024 – Oct. 2024
Vice President , TakeOut Autonomous Driving Club, Gachon University	Mar. 2024 – Aug. 2024
LG Aimers 4th , LG Ai Research	Jan. 2024 – Apr. 2024
Member , GADIS Autonomous Driving Club, Gachon University	Dec. 2023 – Present
CNN Study Mentor , Gyoha High School	Oct. 2023 – Nov. 2023
Executive Member , TakeOut Autonomous Driving Club, Gachon University	Sep. 2023 – Present
ROS Study Mentor , TakeOut Autonomous Driving Club, Gachon University	Sep. 2023 – Present

Honors & Awards

Excellence Award - 2025 SW Centered University Digital Competition: AI Sector SW Centered University Council President's Award	Aug. 2025
- Developed AI that predicts whether the sentence is written by human or generated by LLM. - Top 4	
Encouragement Award - 2025 Bias-A-Thon Competition Director of the SKKU Intelligent Multimedia Research Center Award	Jun. 2025

- Developed technology that detects AI bias using LLaMA 3.1 8B. This competition organizer limit to fine-tune. So, we did prompt engineering, few-shot and LLM inference optimization.
- Top 4

Best Award - LG Aimers 6th Offline Hackathon

Apr. 2025

Minister of Employment and Labor Award

- Achieved first on the leaderboard using only deep learning models although it was structured data.
- Used SAM Optimizer, F1 Loss, Weight Brier Loss, Multi-task Learning and Feature embedding.
- Top 0.06% (1 of 1569).

1st place - Autonomous Driving AI Challenge (Vehicle-Based 3D Object Detection)

Nov. 2024

Minister of Science and ICT Award

- Developed a Deep learning model that can detect pedestrians, cars, and cyclists from 64-channel and 128-channel LiDAR data.

1st place - Autonomous Driving AI Challenge (Edge-Infrastructure 3D Object Detection)

Nov. 2024

IITP President Award

- Developed a Deep learning model that can detect pedestrians, cars, and cyclists from 32-channel LiDAR data.

Encouragement Award - Autonomous Mobility Creation Competition (Unmanned Mobility Division)

Nov. 2024

Korea Transportation Safety Authority Award

- It is a competition where you have to carry out various missions without human intervention using a car that is half the size of a regular car.
- Distinguished cones from the point cloud obtained from 32-channel LiDAR and distinguished whether it is a left cone or a right cone.

Encouragement Award - Data & AI-Based Price Prediction Competition

Nov. 2024

Korea Agro-Fisheries & Food Trade Corporation Director Award

- Participated in a competition to forecast agricultural product prices 10, 20, and 30 days ahead using various features.
- Built a deep learning-based time series model leveraging 30,000 data points for accurate price prediction.
- Top 0.6% (3 of 1156).

Best Award - 2024 GBT Hackathon

Oct. 2024

- Participated in a news classification competition using 55,000 article titles and keywords.
- Conducted model comparison and found that LGBM with SVD and TF-IDF outperformed a BERT-based model.
- Top 2.

Silver Award - 2024 Artificial Intelligence Korean Language Proficiency Evaluation Competition

Sep. 2024

National Institute of the Korean Language Director Award

- Developed a dialogue understanding model to select the most contextually appropriate response from three choices.
- Evaluated multiple LLMs (LLaMA3-8B, Gemma2-9B, SOLAR-10.7B); selected SOLAR-10.7B as the backbone model due to superior performance.
- Top 5.

Sponsorship Award - 2024 SW Centered University Digital Competition: AI Sector

Sep. 2024

42Maru CEO Award

- Developed a model that can distinguish whether the speaker heard in a voice is real or deepfake.
- Top 11.

Top 7% - Kaggle LMSYS Chatbot Arena Human Preference Predictions	Aug. 2024
- Developed a model that predicts which answer is more preferred based on data collected from the chatbot arena. - used the gemma2-9b-it model as a backbone and utilized 25,000 natural language data.	
Effort Award - Intermediate Autonomous Driving Mobility Race (1/5 Division)	Jul. 2024
It is a competition where a car that is about 1/5 the size of an actual vehicle must drive autonomously on a specific course.	
Top 6% - Kaggle BirdCLEF 2024	Jun. 2024
- Developed a model that can predict species based on the sounds of birds. - Since inference was only possible on CPU, used efficient-b0 model as backbone and tried to solve data imbalance.	
2nd place - DACON Code Similarity Judgment AI Competition (Season 2)	Apr. 2024
- Developed a model that determines whether two C++ codes have the same logic. - I experimented with various backbone models and chose UniXCoder as the backbone because it performed the best. - There are countless combinations of data, so designed it to be randomly combined in the dataset.	
Excellence Award - HL Mando HL Klemove Autonomous Driving Mobility Competition (VLF University Division)	Oct. 2023
HL Klemove CEO Award	
It is a competition where you have to drive on a course that is divided into areas where you have to follow the line and areas where you have to move forward while looking at the wall.	
Encouragement Award - 2023 Data Creator Camp	Oct. 2023
NIA Director Award	
- Developed a model that can classify 50 Korean foods. - Since there is a rule that only Resnet can be used, I used various methods other than changing the model to improve performance.	
Grand Award - UNIST Supercomputing Camp	Jul. 2022
UNIST President Award	
The competition requires participants to complete two tasks over the course of four nights and five days: writing code that parallelizes specific codes to run as quickly as possible, and developing a model for detecting whether a mask is worn.	
Other Awards	
Gachon Telent Award	Apr. 2025
1st place - Gachon University Extracurricular Project Competition (2024-2)	Dec. 2024
1st place - Gachon University Extracurricular Project Competition (2024-1)	Jul. 2024
Scholarships	
Presidential Science Scholarship	Mar. 2025 - Aug. 2026
- President of the Republic of Korea - Selected as one of the Top 60 Countries for Developing World-Class Scientists.	
Academic Excellence Scholarship	Sep. 2023 – Feb. 2025
Gachon University	

Technologies (Skilled)

Languages: C++, C, SQL, Python

Technologies: PyTorch, ROS

Tools & Platforms: Git, GitHub, Docker, Linux (Ubuntu), MacOS, Windows
